Sergei Iordanov

Senior Backend Engineer | Python, Go | Django/FastAPI | Team
Leadership, Architecture, Product Delivery

Bishkek City, Kyrgyzstan

Experience

zvonok
4 years 9 months

Senior Backend Engineer / Team Lead
January 2023 - Present (3 years 3 months)

Full-Stack python developer
July 2021 - December 2023 (2 years 6 months)

Languages: Python, Lua, Golang, Vue, Vanilla JS

Frameworks: Django, DRF, FastAPI

Databases: PostgreSQL

Tools: Kubernetes, Docker, Dramatiq, RabbitMQ/Redis

I have experience in building architecture, creating MVPs, and improving
products.

Achievements at Zvonok

- Lead one of the development teams (5 developers).
- Conducted interviews for new employees for Junior/Middle+ positions.

I actively participated in product improvements and the development of new
features:

- Designed and implemented the key functionality for the service (NDA). One
of the main profitable things

- Designed the architecture and MVP for a multilingual project using Django +
Bootstrap (SSR). Later, I managed this project (accepting pages from external
agencies and further development).

- Optimized the frontend interface (pagination, infinite scroll, etc.). This logic
was later applied to all project pages.

- Accelerated tests by 3 times and identified architectural issues.

Implemented automated testing in the project.

Added multiprocessing in tests to speed up execution in the monolith.
